

Paragraph Writing

মূলত **Paragraph** অংশের মোট নম্বর ১০।

English 1st and 2nd Paper এ ২ টি ভিন্ন টাইপের paragraph এক্সাম এ এসে থাকে।

English 1st paper এ ১ টি নির্দিষ্ট topic এর ওপর কত গুলো প্রশ্ন দেয়া থাকবে। প্রশ্নগুলোর উত্তর প্রদানের মাধ্যমে একটি Paragraph লিখতে হবে।

Paragraph টি এমন ভাবে লিখতে হবে যেন সবগুলো প্রশ্নের উত্তর ঐ **Paragraph** এ পাওয়া যায়।

English 2nd paper এর **Paragraph** অংশে কোন প্রশ্ন দেওয়া থাকবে না।

পরবর্তী পৃষ্ঠা গুলোতে **Paragraph** এর কিছু **examples** দেওয়া হলো।

- Write a paragraph on 'Tree Plantation' in about 200 words answering the following questions :

- a) What is tree plantation?
- b) What do we get from trees?
- c) Why should we plant more trees?
- d) When is the suitable time for tree plantation?
- e) How can we take care of them?

Tree Plantation

Tree Plantation means to plant trees in a fixed or different areas to produce wood. The importance of tree plantation can't be ignored any more. Through tree plantation our environment remains balanced properly. Natural calamities can't occur unexpectedly. Our demand of food is met up. Oxygen is properly balanced in air. The most important thing is that ecological balance remains fit for the betterment of the maintenance of humans and animals and plants as well. If trees aren't planted, we can't get food, oxygen and different kinds of needful elements from the trees. Therefore, there is a close relationship in between trees and humans. If there had been no trees, the environment would have lost balance. Floods and drought may occur repeatedly. Lands would turn into desert place. The rainy season is the best time for plantation of trees. We should take some effective measures to grow them well . We should take care of them properly as to the animals or other concerns can't damage them. We can get available trees from any nursery or govt. agriculture department. We can take part in tree plantation campaign. We should make the tree plantation program successful for a better habitat.

- (a) What does a tree do for us?
- (b) What happens if there were no trees?
- (c) What is the effect of the loss of trees?
- (d) What should be done to save mankind?
- (e) How can be made the earth greener, cleaner and safer?
- (f) What part do people play in protecting trees and increasing forests?

Tree plantation

Tree plantation is not an option but a necessity. By tree plantation we mean the act of planting trees and plants on a regular basis. In other words, tree plantation is the opposite deed of cutting down trees. Therefore, tree plantation can be defined as a move to maintain ecological balance for the common benefit of humans and animals. There are many vital causes for planting trees. The first and most significant reason for which we should plant trees is humans' need for oxygen. Trees produce oxygen and absorb carbon dioxide. We cannot survive a single minute without oxygen. Again, by sucking up the toxic carbon di-oxide, we breathe out trees keep our environment habitable. Besides, we ought to plant trees for fruits, flowers, and timber. Also, trees are necessary to cool down city life, prevent soil and river erosion, screen ultra violet rays from the sun, accommodate fauna, and to fight climate change. We should plant trees mostly during the rainy season. We should plant trees on roads, around schools and houses, on roof tops of the buildings in cities, on river banks, and along sea shore. We have to take proper care of the trees we plant. To do this we should make fence around them, support them with sticks and water them if necessary. Observation of tree plantation week by government can go a long way to make people conscious of tree plantation. Besides, the government can broadcast educative programmes on this issue on radio and television. Also, the government should instruct all public offices and institutions to plant trees and check corruption in forestry sector.

- Write a paragraph on 'A Book Fair' on the basis of the questions given below:

- a) What does a book fair mean?
- b) What is the occasion of the fair?
- c) Where is it held?
- d) How is the environment of the fair?
- e) What is the impact of the fair?

A book Fair

A book fair is a place where books of various kinds are brought for sale and display. It is a very popular fair. In fact, a book fair is considered to be an occasion of great festivity to the book-lovers. It is usually held in the winter season on an open place in most of the major cities of the country. The main thing about a book fair is not sale but display of books on different subjects. It is organized by various institutions on various occasions, namely, Martyrs Day, Victory Day, Independence Day etc. The leading publishers of the country set up stalls of their recent publications as well as old ones. Various kinds of novels, poetical works and science fictions are mainly available in a book fair. A festive look prevails all around. The renowned artists, poets' intellectuals gather there and take part in the seminars and cultural programmes. Last year, I paid a visit to the Ekushey Boimela, the most popular book fair held in the premises of the Bangla Academy. My personal impression about a book fair is that it can play an important role in developing the habit of reading books among the people. It is a device to spread culture, education and knowledge. It changes our outlook on life and widens our domain of learning.

- (a) What is a book fair?
- (b) What was the occasion of the fair?
- (c) Where was it held?
- (d) How was the environment of the fair?
- (e) What experience did you gather by visiting the fair?

My Visit to a Book Fair/ A Book Fair I Have Recently Visited

A book fair is a kind of fair where different types of books are displayed for sale. Nowadays, it has become very popular in our country. Last month, I visited a book fair. I went there with my elder brother. The fair was arranged on the occasion of 21st February. It was held at the Bangla Academy premises. As it was my first visit to a book fair, I was really surprised when I entered the fair. There were hundreds of stalls in the fair. The environment was really charming. The stalls were arranged systematically. There were information counters. There were also some stalls for taking snacks. I saw that all kinds of books such as fiction, drama, poetry, novel, biography, translation, children literature, story books, etc. were available in the fair. I bought some books on science fiction and comics. After walking for a long time, we became tired. So, we entered a food stall and took some light foods. Suddenly, I noticed a crowd in front of a stall. I went there and became really surprised seeing my favourite writer Dr. Muhammad Zafor Iqbal the seminar some renowned personalities of our country delivered speeches on the importance of books in our life. After that we left the fair, but I took with me a lot of pleasant experiences.

In the name of modernization, man is cutting down trees in great numbers that has led to the destruction of great forests and lives of many animals and plant species. We fail to realize that trees are the most important aspects of our planet and the existence of trees plays a vital role.

Now, write a paragraph on 'Deforestation'.

Deforestation

Deforestation means cutting down trees in large number. The causes of deforestation are many. Bangladesh is one of the most densely-populated countries in the world. Her population is much more in proportion to its area. This huge number of population needs more food, shelter, agricultural land, fuel, furniture, medicine etc. People cut trees for various purposes. Most of the villagers cut down trees to use them as fuel. Some of them use trees as wood, wooden furniture and some sell trees for getting quick profit.

There are some dishonest people who cut trees in the forests to make money. The effects of deforestation are too many to describe. This destruction disturbs our ecological balance. The existence of wildlife is going to be threatened. Due to deforestation carbon dioxide is increasing worldwide. As a result, the world is becoming warmer. The sea level is rising and many parts of the world are going to be engulfed by the sea in near future. On the other hand, new areas of the world are turning into deserts as a result of deforestation. It also causes serious damage to the soil, as trees give protection to soil as well. Aftermaths, the soil gets sediment in the riverbed and causes frequent floods. So, if we destroy trees at random, one day the country may turn into a great desert. All living animals and birds will not find any food or shelter to live in. The temperature will rise and it will cause green house effect. The country will be unsuitable for living and various natural calamities like flood, drought, storm, earthquake etc. will occur in our country. Immediate measures should be taken to combat deforestation. People should be made aware of tree plantation through mass media. In addition, tree plantation program should be extended throughout the country to make our country evergreen, fruitful and prosperous.

- Imagine that you are studying on Environment Pollution. Read the questions below and write a paragraph by answering them.

- (a) What is environment pollution?
- (b) What are the elements of the environment?
- (c) How are the elements of environment being polluted?
- (d) What is the effect of pollution?
- (e) How are people responsible for environment pollution?
- (f) What should we do to stop environment pollution?

Environment Pollution

The surroundings in which a person, animal or plant lives are called environment. There are many elements in our environment. Air, water, soil, plants, animals, etc. are such elements. They are essential for the environment as well as human beings. These elements should be sound for

our sound living. But when they are polluted and their essential balance is disrupted, this phenomenon is known as environmental pollution. Nowadays, almost everywhere, our environment is being seriously polluted. In many places in our country, the environment has become extremely polluted. We ourselves are responsible for this severe pollution. Industries and factories emit huge amount of smoke, gases and fume.

Motor vehicles also emit large amount of smoke and gases. All these pollute air seriously and polluted air is very harmful for us. Water gets polluted due to dumping of industrial wastes and chemical fertilizers and insecticides which are washed away into rivers and canals. Due to the indiscriminate use of vehicle horns, loud speakers, mikes, etc. sound is polluted. Soil is polluted by harmful chemical fertilizers and insecticides. Besides, people are cutting down trees at random. All these are causing environmental pollution. Consequently, man becomes sick, animals and fishes are reducing, global warming is increasing, polar icecaps are melting, frequent floods are occurring and so on. We all should be aware of this harmful pollution and take effective measures to check it.

• Answer the following questions to write a paragraph on Global Warming.

- a) What is global warming?
- b) What are the causes of global warming?
- c) What are the effects of it?
- d) How can we prevent global warming?
- e) If we fail to prevent it, what may happen in near future?,

Global Warming

The term 'Global Warming' refers to the rise in the temperature of the planet, earth. Nowadays, global warming has made the environmentalists think about the dreadful consequences. It has become a threat to all living beings on earth. Global warming is the result of greenhouse effect. It is the gradual warming of the air because of heat being trapped in earth. This is happening because of environmental pollution. We are destroying our tropical rain forests by establishing industries, mills and factories and using CFC gas. Thus, we are polluting our environment. By the destruction and burning down of our forests, the amount of carbon dioxide is increasing.

The increased amount of carbon dioxide around the earth has made a layer in space. The sun rays are coming through the layer but the heat cannot pass through that layer. This is why, the heat is being trapped in earth and making our globe warmer. As a result, the temperature of the world is increasing day by day. The weather pattern is changing. The alarming news is that the polar ice caps are melting and this might cause the flooding of huge areas of the globe. Bangladesh cannot escape the paws of this enemy. The lower southern part of the country may go under water one day. Effective measures should be taken by the world community to control global warming. Emission of carbon dioxide should be reduced. Deforestation must be stopped and more trees should be planted. Above all, people should be aware of preventing the pollution of the environment.

- Write a paragraph on Bangabandhu Satellite-I' based on the answers to the following questions,

- What is a satellite?
- Where was the Bangabandhu satellite designed and launched from?
- What is the location of this satellite?
- What is the longevity of it?
- How will Bangladesh be benefited by this satellite?

Bangabandhu Satellite-1

A satellite (man-made) refers to an artificial body placed in orbit round the earth or another planet in order to collect information for communication. The Bangabandhu Satellite-I is the first Bangladeshi geostationary communication satellite. The satellite has been named after the father of the nation, Bangabandhu Sheikh Mujibur Rahman. It was designed and manufactured by Thales Alenia Space and its launch provider was SpaceX. It was launched on May 11, 2018. Its launch station was Kennedy Space Center on Merritt Island, Florida, USA and the ground control stations are in Betbunia, Rangamati & Gazipur in Bangladesh. The satellite is located at the 119.1° East longitude geostationary slot. With a total mass of 3700 kg and powered by 2 deployable solar arrays and batteries, the expected longevity of the satellite is 15 years. The satellite provides Ku-band and C-band television broadcast and data relay services across Bangladesh and

neighboring areas. This satellite will bring about enormous development and uninterrupted telecommunication system in Bangladesh. At present the country's television channels have been renting bandwidth from Chinese, Indian and Singaporean satellites at a cost of about \$14 million a year. It is expected that Bangladesh will not only save such amount of money in the future, but also would earn a lot by letting other countries to lease the unused bandwidth. Besides, some other sectors like telemedicine, e-learning, video conference, defense and disaster management system will be improved for this satellite in Bangladesh. The launch of satellite Bangabandhu-1 by Bangladesh brings both prospects and challenges as it is expected to help the country save foreign currency, while the challenges remain in effectively running the venture.

Physical Exercise

Physical exercise is the movement of our limbs. Our body is like a machine. Our body needs movement. Regular exercise is essential to keep our body sound. It is good for health. It gives us health and energy. It is necessary for the preservation of health. We cannot enjoy sound health without it. Physical exercise makes a man active and strong. It keeps him free from various fatal diseases. Physical exercise develops all parts of our body. It keeps us sound. It helps us to be cheerful and active. It also helps us digest food and keeps the body free from various diseases. Our life is full of struggles and activities. One can tackle them simply if one has physical fitness and mental alertness. Physical exercise is essential to make our body physically fit. A person can have a sound mind only when he has a sound body. So, in order to have a sound mind in a sound body physical exercise is of greatest significant for all. Exercise takes our mind away from the drudgery of work and fills it with joy. It increases our vitality. Physical exercise also gives us fresh energy refreshes our mind and helps us to return to work with improved strength. So we should take physical exercise every day. Health is the root of all happiness. Physical exercise keeps us healthy. Many people do not take physical exercise regularly. Then soon lose their health. They fall victims to many diseases. It helps a student to a great extent. It helps him to concentrate his mind to his studies. So the necessity of taking exercise should not be ignored. Physical exercise prolongs our life and strengthens our mind. We can say that the importance of physical exercise is great. For a happy and cheerful life, it is essential. So we all should take regular exercise.

- Answer the following questions to write a paragraph on 'Drug Addiction'.

- What is drug addiction?
- What are the causes of drug addiction?
- How does it affect young generation?
- Why should the young generation have knowledge on drug addiction?
- Give your own suggestion to get rid of this menace.

Drug Addiction

Drug is usually used as medicine to cure diseases. But sometimes it is taken by some people as a habit to get amusement or relief from pain. This abuse of drug is called drug addiction. Drug addiction is a curse to modern civilization. Nowadays, it has become a global problem. Drug addiction has grasped the young generation of our country. The people who take drug cannot stop taking it. There are some reasons behind this addiction. Some take drugs to forget their painful past or present. Again, some take drugs as a pursuit of pleasure. The youngsters, at first, take drugs for fun but afterwards it turns into an addiction. The after effects of drug addiction are very harmful and serious. The health of the addicts break down. They lose their mental and physical health. They lose their social status and the love of their near and dear ones as well. Everybody dislikes or hates them. Various kinds of diseases attack them. They suffer from amnesia, insomnia, nausea, physical weakness, blood pressure and many other critical diseases. Their lungs, kidneys and livers also get damaged. Drugs are expensive. So, the addicts often go for stealing, hijacking, killing and all sorts of misdeeds to manage money. For this reason, it should be stopped at any cost. Addiction to drugs can be checked by creating social awareness. The mass media can play an effective role in this regard. Seminars, discussion and debate should be held in schools, colleges and universities now and then. The government alone cannot solve this problem. People must cooperate with it. Above all, the rules of religion can play the most important role in this regard.

Board Questions

A Moonlit Night

A moonlit night is a pleasant and enjoyable night for us. Especially, when there is a full moon, the night appears before us with all her magnificent beauty. The moon then looks like a disk of dazzling silver. Everything seems to be wrapped in the silvery beam of the moon. It bathes the whole earth with her pleasant light. Canals, Rivers, and ponds seem to laugh in the splendid light of the moon. The moonlit night has a great influence on the mind of people of all ages. The little children can hardly think of going to bed without enjoying the night. A newly married couple comes out of the house and passes some hours outside to enjoy the beauties of the night. Elderly men and women also can't keep indoors. They gather in the courtyard and pass several hours gossiping. Poets and lovers of Nature feel a thrill of joy in their hearts. Even the birds and beasts come out leaving their resting places to enjoy the beauty of the night. Of all aspects of Nature, a moonlit night is, perhaps, the most beautiful and attractive. It keeps us away from the dullness of a night and makes us sublime in thoughts and deeds.

Traffic Jam

Traffic jam is an irritating experience suffered by thousands of city dwellers every single day. It is basically a blockage due to huge numbers of vehicles stuck in a place. It is considered as a major problem of our time. Our population has increasing day by day. Thus, the number of vehicles on the roads is also growing high. So, the number and size of roads in proportion to vehicles are less accordingly. This is one of the very first reasons that excites the blocking of vehicles and thus creates a static line, ultimately brings traffic jam. Besides, there is a lot of idiots who parks their vehicle here and there. There are a lot of drivers who drives by their will and shows overtaking tendency. Many pedestrians don't use foot over bridges and stop running vehicles to cross the roads. Poor management of traffic causes congestion. Various movements caused by political instability also creates jam. However, traffic jam is harmful in every aspect of life. It is most dangerous for dying patients carried to the hospital by ambulance. Students, employees, officers, workers, and all classes of people are suffered from it. It takes thousands of working hours every day. Thus, it hampers the economy of a country badly. However, we can efficiently recover the time lost in the congestion by exercising, reading newspapers or books or scrolling through social media. Traffic congestion can be alleviated by taking many well-researched measures. Increasing size and number of roads, building flyovers, U-loops, foot over bridges will surely help. Authorities can also introduce modern amenities like metro rails to reduce traffic jam. Public transports must be increased. Discouraging usages of private cars by increasing taxes will be a good move. Moreover, traffic rules must be more strict. Unlicensed drives should be eradicated from roads. A certain level of education can be imposed to gain a license. However, a good concord of measures from various authorities will alleviate traffic jam. Mass people also have to be aware of the rules.

Early Rising

Early rising is the habit of getting up from bed early in the morning. If one wishes to rise early in the morning, he can make it into a habit. This habit is very useful to a man. It improves his health and gives him energy. An early riser can perform his daily work on time. He has nothing to worry about. He is never in a haste. On the other hand, a person, who does not get up early generally faces some problems. He may be late for office, may miss schedule or even fail to perform his daily work timely. He also suffers from bad health. He cannot enjoy the fresh air of the morning. Early risers, on the other hand, can take the advantages of a beautiful time. They can go out for a morning walk. They can hear the songs of birds, see the smiling leaves and flowers and can inhale the pure morning air. They can perform their morning prayer. All these help them enjoy a healthy life physically and mentally because the nature is completely calm and quiet then. The beautiful gifts and colorful nature reminds everybody of the almighty creator. So, the early riser can enjoy all these and be benefited. An English proverb says, **“Early to bed and early to rise makes a man healthy, wealthy and wise.”** So, we should be sincere to form the habit of early rising.

Load Shedding

Load shedding is currently the most discussed problem in Bangladesh. It has become a national crisis. There are many causes of load shedding. Firstly, inadequate generation of the power supply is the main cause of load shedding. Secondly, the unplanned distribution of electricity is also another cause. Thirdly, illegal connections and artificial shortage of production are also responsible for load shedding. Besides, stealing electricity in the pretext of system loss is another cause of the problem. There are many bad impacts of load shedding. It creates problems that have far-reaching consequences on the socio-economic development of the country. It frustrates national, social, and personal progress. Because of load shedding, the entire lifestyle both domestic and industrial comes to a standstill. Domestic life becomes painful as the housewives group in the dark kitchen. The factories, mills, industries come to a standstill. It hampers the normal productivity of mills and factories. Students can not continue their studies. Emergency medical treatment is badly hampered. Medical patients may suffer terribly. The foods kept in refrigerators get rotten because of load shedding. Load shedding helps criminals to commit crimes in darkness. Now the problem is going out of control day by day. At first, the government should come forward to solve this. It is we the human beings who are responsible for load shedding. The government should set up more electricity plants to meet the demand for electricity. We should not waste electricity. Authority must disconnect illegal connections and fine the responsible persons. The authority should also have a plan for the distribution of electricity.

Uses and Abuses of Mobile Phones

Air is a life-giving force. Both animals and plants inhale oxygen or carbon dioxide from the air. So, if the air is polluted, naturally it makes a great threat to all. That's why air is an important element of our environment. But the air is being polluted so severely that this problem has become a global concern at present. Air is polluted in many ways. But air pollution is more acute in urban areas because vehicles and mills and factories here emit carbon monoxide gases and smokes that pollute our city air seriously. Besides, burning of trash and indiscriminate discharge of human waste in the open air also cause of serious air pollution. Vehicles that emit excessive smoke should be banned. Lead-free petrol should be used and compressed air should be used in vehicles to minimize air pollution because the **WHO** and the UNOs environmental section indicate Dhaka as the most polluted city in the world. By inhaling polluted air we are falling victim of bronchitis and other respiratory diseases. For this the air is also polluted by many chemicals. Some acids, such as; HNO_3 , H_2SO_4 , NO_2 , NO_3 which mixes with the rain water and later there occurs acid rain which is very harmful for the whole world. The best way to stop air pollution is to plant trees and take care of them. The wildlife must be preserved and the mass cutting down of trees must be prevented.

A Winter Morning

A winter morning is the usual morning of the winter season. Generally, a winter morning is cold, misty and everything outside is covered with dense fog. Sometimes the fog is so dense all around that the sunray can't pass through it and people can hardly see anything. At night, dewdrops fall on the leaves and grass but when the sun rays fall on them, the dewdrops shine like pearls. It is so cold in the morning in the winter season that the domestic animals don't come out. Even the chirping of the birds can't be heard. The children and elderly people get up late from sleep. On a winter morning, people enjoy many delicious food and sweetmeats like pithas, cakes, date juice, pies, and many more. Though a winter morning is enjoyable for the rich and middle-class people, it brings misery for the poor and village people. The poor people don't have enough warm clothes, so they shiver in the cold wind. Village people bask in the sun and when the sun rises late, they gather straw to make fire and warm themselves. Sometimes the day labourers don't get work in cold weather and suffer for food. Homeless people sleep at the railway station and shiver in the lash of unbearable cold wind. However, we should help the poor people by giving them warm clothes and food. The government should also help them so that they can have shelter to live in. However, winter morning is delightful for the rich but miserable for the poor.

A School Magazine

A School Magazine is immensely connected to the literature side of the pupils of any school. It is generally published once every year. And the works related to the publication of a school magazine gives much pleasure to all. Not only the students but also the teachers join this venture to publish a school magazine that reflects the natural talents of the students and teachers. First of all, a magazine committee is formed to supervise the whole process and usually, a senior teacher takes over the charge. The authority of the school bears the cost of publication but the works for this literary piece are voluntary. Students happily join the work and they are highly encouraged when their names come printed on a school magazine. It is announced to every class to submit their creative writings or other submission for a school magazine. Students and teachers write their feelings in the form of stories, essays, poems, jokes, etc. All the writings are submitted to the editorial committee who selects the appropriate writings for publishing on a school magazine. After the writings are selected, students and teachers work together to decorate the magazine in the final stages. Not only the writings, all the achievements and glorious moments of the school also go to the magazine. The head of the institution gives his speech to motivate students in co-curricular activities so that they can nurture their hidden talents from a very young age. After all the work has been done, it is then finalized and sent to the press for publication. After various stages of proofreading, the final publication comes out and it is delivered to the school. The school authority then offers every student their copies. It is a moment of joy and pride to see their creations in a school magazine. It encourages them to practice more and it brings out their natural talents. A school magazine also reflects the educational condition of any institution. One can easily look at a school magazine of any educational institution and justify whether the standard of education is up to the mark or not. Publishing a school magazine is necessary to keep the students moral strong and it is a practice that should be continued.

Our National Flag

The national flag is a piece of fabric with a special colored design used as the token of a particular country. It is the symbol of the independence of a nation. Every nation of the world has a national flag of its own. Bangladesh has also a national flag. We achieved it in 1971. The proportion of its length and breadth is 10:6. It is a piece of rectangular green cloth with a round red disc like patch in the middle. The radius of the red circle is one-fifth of the length of the flag. The green color represents the admiration of youthful vigor as well as the green fields and the evergreen subtropical forest of 'Bangladesh. The red circle symbolizes the rising sun with new hopes and aspirations for a new nation. The red color also symbolizes blood. It reminds us of the history of our independence. Many heroic sons of this soil sacrificed their lives for the cause of independence. After a bloody war, Bangladesh finally became independent on 16th December 1971. The green and red color of our national flag represent the spirit of our independence. The national flag is hoisted on the premises of all govt. offices and institutes in Bangladesh. It is kept half-mast on national mourning days. Our national flag always inspires us to dedicate our lives for the greater interest of the country. We can uphold its honor by doing our duties to the nation.

The Life of a Farmer

A farmer is a person who cultivates land and grows crops. He is a very important person in our society. Generally, he lives in a village. His house is made of corrugated iron sheets or straws. An ideal farmer lives a very simple life. He earns his livelihood the sweat of his brow. He works from morning till evening. He gets up very early in the morning and takes a little breakfast. He goes to his field with a wooden plow and a pair of bullocks. He cultivates and prepares his land with simple hand-made tools. Sometimes he is so busy that he cannot make time to go home for the noonday meal. He has both pleasures and pains in his life. He gets pleasures when he has a good harvest. But he gets pains when his crops are destroyed by droughts, floods or cyclones. Though a farmer works hard, he cannot meet the basic needs of his family. He lives from hand to mouth. He also suffers from many diseases. However, a farmer can improve his condition by availing of the easy loans and by planned use of it. He should take advantage of scientific mechanized tools and the latest method of cultivation. In our society, a farmer is meant to belong to the lower class. But in reality, an ideal farmer is an asset to the country. He contributes a lot to the economy of the country. We can better their overall condition taking concerted steps.

A Railway Station

A railway station is a place where trains stop at and start from. It is one of the busiest and crowded places. People of all ages and all walks of life are seen here. Passengers come and go. A kind of eagerness can be noticed in their eye and face as they are on the way to their respective destination. Moreover, train journey creates a kind of thrill and excitement in the passengers especially in the young ones. Some come out of the station followed by coolies with luggage on their heads. They look tired but are now somewhat relieved of the journey. Some are busy buying tickets. They push one another to go ahead. In almost every station, there is a book stall where newspapers and magazines can be found. The total place become lively by the hue and cry of the passengers and above all by the peculiar voices of the hawkers who try to attract the attention of the buyers. The building of a railway station is brick-built. It is generally painted red and has a very antique look. At the Iron Gate stands a railway official with a hat on the head. In the rest room, passengers are found waiting for the train. When the expected train comes, they get into the train. One can see from a distance the green, blue and red signals'. The flagman moves about with red and green flags. The station is indeed a busy place. But as soon as the train steams off, the station loses its main business and looks somewhat deserted, calm and quiet. The business of the coolies and hawkers also gets lessened. Thus, a railway station alternately becomes busy and quiet.

Climate Change

Climate change is one of the burning issues the world is facing currently. It is an issue that isn't targeted to any specific group of people rather it will affect the whole of mankind. But it will affect people living below the poverty line the most. Global warming is considered one of the main reasons for climate change. Global warming indicates the rise in temperature worldwide which is caused by different reasons. As the developed countries are producing tons of greenhouse gases regularly, it is damaging the nature very fast. But the developing or underdeveloped countries have to face the result of climate change first. As a result of global warming, different natural calamities like floods, cyclones, drought will occur and they will take thousands of lives. As poor people worldwide have no safety measure against all these, they will suffer the most. Moreover, polar ice packs will also melt with the rise of temperature which is very risky for the people living in coastal areas. It has been found in researches that if the average temperature rises by 2 degrees Celsius, sea level will rise by 1 meter. It will cause thousands of people living in coastal areas to leave their accommodation. As Bangladesh is surrounded by the Bay of Bengal in the southern part of the country, Bangladesh is also at risk of being affected by climate change. With the industrial revolution, millions of factories are set up and they are emitting chemicals that are very harmful to nature. If they don't take proper steps to prevent this, it will take a short time to damage the atmosphere of this planet. Even using excessive motor vehicles leads to carbon emission which damages nature greatly. Though the world leaders are discussing to reduce the carbon emission globally, we should be aware of the upcoming danger. Our government should take proper steps to save the greenery and tree plantation can play a vital role to fight climate change. Also, the factories should be compliant with the safety rules so that no harmful chemicals can enter nature without being treated. This way, we would be able to build a world for our next generation which will be healthier and safer. It is our duty to save our planet from the adverse effects of climate change and it is high time we should take steps.

The Importance of Female Education

Female education means education to a nation. Because, if a nation wants to be educated, it needs an educated mother first. An educated mother can educate her child well. Moreover, in order to maintain its existence and build a successful and beautiful national life, it is necessary to focus on female's education. So men as well as women have to be educated. Through education a woman can make herself worthy. Female contribute more than male in education. Because every child grows up in his mother's lap. The mother spends much more time behind the child than the father. As a result, the child develops in the ideal of the mother. Only an educated mother can bring up her child in good education. Referring to the influence of women in education, Napoleon said, 'Give me an educated mother, I will give you an educated nation. Therefore, in the overall development of the country and the nation, women's education must be given priority. Educated women are one of the tools to fulfill the biggest interests of the nation. Although women in our country generally considered as housewives and mothers, they have come a long way today. Women have a special role to play in building a peaceful society by maintaining happiness and peace in family life as well. Only an educated woman can keep the happiness, peace, income and prosperity of the world in order. Today's children are the leaders of tomorrow. And we want an ideal mother to raise these children. If children do not develop into ideals, the nation will soon be destroyed. Women's education needed to raise an ideal child as an ideal mother. Women's education is invaluable in gifting an educated nation to the next generation and improving national life.

The Importance of Learning English

English being an International Language dominates all over the world. It is the only language to communicate with other countries internationally. Hence arises the question of Communicative English. Communicative English means to express oneself willingly. It refers to the ability to use a lan-

guage in an appropriate way in different circumstances. There are two ways of developing communicative competence in a language. The first is the acquisition which is similar to the way people develop their ability in their mother tongue. It is a natural subconscious process in which users are not usually aware of acquiring a language. They are aware only of the fact that they are using a language to communicate. In non- technical terms acquisition is picking up a language spontaneously. The second way of developing communicative competence in a language is learning that language. It also refers to conscious knowledge of a language knowing the rules of language use, being aware of using them and being able to talk about them. In non-technical terms learning is to know consciously about a language. It is described as explicit learning. Language specialists believe that acquiring a language is more successful and longer lasting than learning. It needs perseverance, hard working, concentration etc. At present teachers also encourage the learners of a second language to practice and experience the language in different situations where they are involved in communicating with others. A statistical data shows that about 350 million people speak English as their first language and another 300 million people use it as a second language. English is the official or semi-official language in more than 60 countries and of many international organizations. The International Olympic Committee, for example, always holds meetings in English. English helps the international community and the business world to communicate across national borders. More than 80% of all information in the world's computers is in English. Some companies provide English language training for their staff. It is a wonder that job facility often asks for a good working knowledge of English. Many experts believe that English usually helps them to get good jobs with handsome salaries. Communicative English has been introduced both at SSC and HSC levels all over the country. It is a new system so it is taught everywhere in the country. Questions will be set in accordance with the communicative style. This system will help the learners establish good communication with foreign countries. English is an international language. It has an influence all over the world. A man in any country can speak and write something in English. It is a particular or specific language to communicate with different countries. An English knowing person of any country has a great value/demand in the international business and community as well. Without the power of vision a man can become blind likewise a man without an optimum knowledge of English is not nationally and internationally important. Conscious knowledge of any language except English may help a man to be important in his own country for it can express itself to the common people. That's why teachers encourage

learners to concentrate on their mother tongue. Mother tongue of any nation is a limited language within the range and area of the country. Such a knowledge of English makes a man internationally important. To communicate with people of other countries needs a good command over a language especially English. Since it is a predominating language, it needs a good and long lasting verbal and non-verbal communication that can easily be established with the learning of English.

Food Adulteration

Food is the basic need for human life. It helps human beings to grow up and ensures to survive on earth. So, it is called human fuel. But it is a great regret that these life leading foods are being adulterated indiscriminately. Basically, vegetables, oil, fruits, fishes, milk products, baby foods, fast food, are being adulterated daily. There are many reasons for food adulteration. Various food and beverage industries use poisonous chemicals to keep food fresh look, longer-lasting, and high profit. The main reason for food adulteration is the endless greed of the immoral and dishonest businessmen. Human life is less valued to their profit. Different researches initiated by National Food Safety Laboratories, Food and Agricultural Organization (FAO), and many health organizations prove that most of the foods are being adulterated randomly. Adulterated foods contain harmful substances like DDT, Aldrine, formalin, Chlordane, etc. which cause many serious diseases such as cancer, liver damage, kidney failure, heart diseases, high blood pressures, headache, etc. All adulterated foods are very detrimental to our health and life. It creates slow poisoning in the body and leads to certain death. So, it is high time to stop food adulteration anyhow. Though our government has already taken some positive steps, it is not sufficient. A monitoring cell has to be formed to monitor the food manufacturing, wholesale, and retail sales sections. Dishonest businessmen should be identified and punished. After all the govt. law enforcement agencies, mass media, and common people have to work through a concerted effort to solve the issue.

Uses and Abuses of Mobile Phones

Now a day Mobile Phones have become a basic need for us. So Mobile phones have completely changed the lives of humans for many years. Mobiles have become widespread all over the world. With the invention of the mobile phone, the writing of letters has become a history. In addition, mobile phones also play an anti-social role in mankind. It depends on the use of it. In summary, we can say that mobile phones have their uses and misuses that depend entirely on the user. There are lots of uses of mobile phones. Mobile phones are an integral part of our daily communications. All mobile phones have the ability to voice and simple text messaging services. Their small size, relatively low cost, and many uses make these devices very valuable to advocates who are increasingly using them for communication and organization. On the other hand mobile phones especially smartphones are used to watch movies, play games, listening to music or to browse the internet as well. On the other hand, there are some disadvantages of mobile phones as well. Teenagers or students are greatly influenced by the evil side of mobile phones. Instead of using the mobile phone for their benefits some students or teenagers are seen wasting their valuable time indulging in listening to songs, playing online games, spending hours after hours in social networking sites, sending offensive messages, watching pornographic videos etc. Again some physician claims that excessive use of mobile phones can be health hazardous. The Mobile phone is the most popular and useful gadget in the present time. Though there are a few disadvantages of mobile phones, we cannot deny the usefulness or necessity of mobile phones in our day to day life.

Diaspora

Diaspora is a term that means that a group of people is leaving the homeland and settle down to another place. Movement of people from homeland to another place is the main thing. Sometimes it does willingly and sometimes under pressure. Jews people are well known as the first

diaspora people. Abraham was leaving from the homeland of Iraq under pressurized conditions. Refer to diaspora due to take shelter in Egypt. Aryans are the second diaspora. They took shelter in the Indian subcontinent around a thousand years ago from the European homeland. Many reasons are present behind the diaspora. Force, personal interest, war, natural harmful calamities, threat or any other unknown reasons are present behind causing diaspora. People were partitioned between India and Pakistan in 1947. Most recently Rohingyas are taking shelter in Bangladesh from Arakan, Myanmar. It is a very recent issue and religion is the main reason for the diaspora. Due to globalization, people are spread out worldwide countries. Settle in UK, USA, Italy, German, Canada, Australia is termed as very familiar now. More opportunities, better placement, corruption present in the country, to get higher study and others are the causes of willing diaspora. Diaspora prefers as a burden for the giving shelter country. A developed country can manage it. But for the underdeveloped or developing country, it looks like a burden. For stopping diaspora world's leaders should be aware to stop war, dissimilarities, improving lifestyle and fulfill peoples' desires.

Modern Technology

Technology is the most useful form of science for the general population. In simple words, technology is when we take the concepts of science and transform them into gadgets and devices that are useful to us as human beings. When we look around us, almost everything is a result of or a form of technology. For example, the device you are using right now is a form of technology made for communication, or the refrigerator in your kitchen is a use of science that helps to keep your food fresh and cool. With these examples, we see how dependent we are on technology and how important it is for us in our daily lives. It isn't easy to imagine our lives without using any form of technology. For the smallest of communications, we tend to turn to our mobile phones. Even most of the food we eat is packaged in factories using various technologies. Thus, imagining a life without technology is impossible. It is not only a fact of life but also a necessity for all of us. In fact, the smartphone, that is, a mobile phone which can connect to the internet, is becoming one of the fastest-growing and most accessible forms of technology around the world. On a smartphone, you

can click photographs, browse the internet, listen to music, and use social media. With the advent of smartphone technology, the practical purpose of not only communicating with your friends is met, but also so many others, as mentioned. Thus, in today's world, the importance of technology becomes more and more as the years pass. Scientists have done so much to advance humans using technology, and we still have a long way to go.

The Qualities and Duties of an Ideal Student

A student who is sincere to his/her classmates and obedient to his/her teachers is an ideal student. Actually, he/she must possess some qualities so that he/she may be followed by other students. The first and foremost duty of an ideal student is to study hard. She/he should not idle away his/her time. She/he should be punctual, and disciplined and industrious. He/She should avoid bad companies. It is also his/her responsibility to help his/her weaker classmates. He/She should also be cooperative to his/her family. She/he will never be a self-centered person. He/She must engage himself/herself in different kinds of social activities for the betterment of the society as well as the country. An idle student does not confine himself/herself to the prescribed books only; rather he/she studies many other reference books to enrich his/her knowledge. He/She never learns his/her lessons by rote. He/She always takes an active part in other co-curricular activities of school. These make him/her different from other students. An ideal student should be polite in his/her behaviour as it highlights his/her other qualities. He/She must obey his/her elders and love his/her youngers. I want to be an ideal student. For this, I always try to utilize my time. I study while it is time for studying and play while it is time for playing. I am cooperative towards my classmates. I read newspapers, magazines and other books beside my academic ones.

The Sundarbans

Sundarbans Mangrove Forest is the largest mangrove forest in the world. This forest is situated both in Bangladesh and West Bengal, India, delineating to the seaward of the delta. Sundarban is well-known for its rich biodiversity (both flora and fauna). This mangrove forest is considered the world's best mangrove forest for its natural treasure. The total area of Sundarban is about 38,500 sq. km, however, 1/3 of Sundarbans covers with the marshy canal which spread all across the Sundarban. However, the actual forest area is 10,000 sq. km of which all most 6,000 sq. km placed in Bangladesh and the rest in West Bengal, India. The name of Sundarbans Mangrove Forest originated from "beautiful jungle" or "beautiful forest", in the Bengali language (Sundar means beautiful and forest means jungle). The name of the forest might be derived from the Sundari trees which are most common and dominant tree species in Sundarbans. Alternatively, there are also some controversies that the name might come from the term Samudraban or Chandra-bandhe (name of a primitive tribe of that area). However, until now scientists and people believe that the name came from Sundari trees. The regularly flooded Sundarbans saltwater swamp forests lie island within the mangrove forests. The Sundarbans intersected having a complex network of the tidal canal from the Bay of Bengal, mudflats and small islands of salt-tolerant mangrove forests. Sundarbans including Sundarban national park declared as UNESCO world heritage site in 1997. The region is recognized for the eponymous Royal Bengal Tiger, along with numerous fauna which includes parrots, spotted deer, crocodiles and snakes. It's thought there are around 500 Bengal tigers along with 30,000 spotted deer in the Sundarbans. Sundarban also selected a Ramsar site on May 21, 1992. The fertile soils of Sundarban delta got intensive human use for the last several centuries, this extreme pressure causes the destruction of the natural condition of Sundarban, converting the forest area into agricultural land and shrimp cultivation. For more information, around 4 million people live around the Sundarban and of whom 32% people depend on the resources of Sundarban mangrove forest directly or indirectly. Over the last several decades because of added pressure on Sundarban mangrove forest Royal Bengal Tiger has been losing its natural habitat and being an endangered species. However, across the Sundarban forest area, Royal Bengal Tigers act as the defensive barrier against the local intruder.

Digital Bangladesh

Digital Bangladesh' means digitalizing Bangladesh by ensuring an ICT based society where information will be available on the line and where all possible activities of the government and other non-government or semi-government organizations will be performed using digital technology. Making a digital Bangladesh was an election manifesto (2008) of Awami League, one of the leading political parties in Bangladesh. In the 9th National Parliamentary election, Awami League declared to develop Bangladesh into a digital country by the next decade. Bangladesh is an independent country. She achieved her freedom more than 39 years ago. But still she is burdened with many problems like poverty, overpopulation, unemployment, corruption, food deficit, natural calamities, power crisis etc. Considering all these, the present government has aimed at making a Digital Bangladesh to overcome these problems. The motto of Digital Bangladesh is to establish technology based digital governance, e-commerce, e-agriculture, e-production, e-education, etc. emphasizing the overall development of the country and the nation. The benefits of Digital Bangladesh is many. If we can establish a Digital Bangladesh, corruption will drastically reduced. Besides, it will save people's time and money and will make people more enterprising and thus will reduce unemployment problem. It will connect people with the whole world economically, politically, socially, academically and even culturally. It will open doors for the people to improve their conditions. It will also improve banking and financial activities. Money transfer and transaction of business could be made within seconds by clicking the mouse of a computer. Agriculture, health, education, commerce - all these sectors will be highly benefited by making Bangladesh a Digital one.
